

IT MANAGEMENT CONCENTRATION

IT professionals are the “go-to” people when computers and networks require troubleshooting and maintenance and, therefore, IT Managers play a central role in the daily operations of most any workplace. Technology, when properly configured, installed, and maintained, allows businesses and organization to operate at peak efficiency.

ECPI University's Bachelor of Science Degree in Business Administration with a concentration in IT Management blends coursework in business administration and information technology management to give you the education you could use to enter the IT Management field. And with ECPI's year-round program, you could earn your degree in as little as 2.5 years.
